We don't normally do that, but I can make the suggestion to add that to our site at the end.

Thanks!

Hi Ryan,

Thanks so much for this update. I appreciate it. Will you also be posting the final decision (if one is made) after the hearing on your website?

Thanks again,
Jessica

Hi Jessica,

The hearing begins tomorrow morning at 9 AM and you can go on our website to download the Planning Commission staff report and agenda or our "order of the day" or FAQ which has a lot of information and will help you.

IN short - the Planning Commission will begin and they will make a decision after they have heard presentations from staff, the applicant and have listened to all public testimony. Each person is granted 3 minutes to speak so if we have 400 people wanting to speak this will go on for many days and will likely be continued to future dates until it is all complete. Once that is all done the Planning Commission can make a decision which is final unless we receive an appeal (which is likely).

Please see the documents on our web for more info:
http://www.slocounty.ca.gov/planning/environmental/EnvironmentalNotices/Phillips_66_Company_Rail_Spur_Extension_Project.htm

PS you can also watch the hearing on our website (we stream the hearing) here and the link will be live at 9AM tomorrow on this site:
<http://www.slocounty.ca.gov/planning/meetings.htm?>

Thank You,

Subject: Update on Phillips 66 Santa Maria Rail Project--Bloomberg News

Hi Ryan,

This is Jessica Summers, the energy reporter with Bloomberg News. We spoke a month or two ago. I wanted to check in with you for an update on the Phillips 66 Santa Maria refinery rail expansion project. I noticed on your website that a hearing is scheduled for Feb. 4th and Feb. 5th. What is the next step in the process? Will you be making an announcement on the website once the two-day hearing is finished? Will the planning commission be deciding whether or not to fully approve the expansion project? Is that the only approval needed for construction of this project to begin? I wanted to make sure I understand how the process works.

Thanks so much,
Jessica
